

Book Sales

Hello!

Dataset Overview

Books

- Stores information about available books.
- **Column Description**
- **Book_ID** Unique identifier for each book
- **Title** Name of the book
- **Author** Author of the book
- **Genre** Book category
- **Published_Year** Year of publication
- **Price** Selling price
- **Stock Available** inventory

Customers

- Stores customer information.
- **Column Description**
- **Customer_ID** Unique customer identifier
- **Name** Customer name
- **City** Customer city
- **Country** Customer country

Orders

- Stores order transaction details.
- **Column Description**
- **Order_ID** Unique order identifier
- **Customer_ID** Customer placing the order
- **Book_ID** Purchased book
- **Quantity** Number of copies ordered
- **Order_Date** Date of purchase
- **Total_Amount** Order value

Retrieve all books in the Fiction genre

```
SELECT  
    *  
FROM  
    books  
WHERE  
    genre = 'Fiction';
```

Find books published after 1950

```
SELECT
    *
FROM
    books
WHERE
    Published_year > 1950
ORDER BY Published_year;
```

List all customers from Canada

```
SELECT
```

```
    *
```

```
FROM
```

```
    customers
```

```
WHERE
```

```
    Country = 'Canada';
```

Show orders placed in November 2023

```
SELECT
    *
FROM
    orders
WHERE
    Order_Date BETWEEN '2023-11-01' AND '2023-11-30'
ORDER BY Order_Date;
```

Retrieve total stock of books available

```
SELECT
```

```
    SUM(stock)
```

```
FROM
```

```
books;
```

Find details of the most expensive book

```
SELECT  
    *  
FROM  
    books  
ORDER BY Price DESC  
LIMIT 1;
```

Show customers who ordered more than one quantity

```
SELECT  
    *  
FROM  
    orders  
WHERE  
    Quantity > 1  
ORDER BY Quantity DESC;
```

Retrieve orders where total amount exceeds \$20

```
SELECT
    *
FROM
    orders
WHERE
    Total_Amount > 20
ORDER BY Total_Amount;
```

List all available genres

```
SELECT DISTINCT
```

```
Genre
```

```
FROM
```

```
books;
```

Find the book with the lowest stock

```
SELECT
```

```
    *
```

```
FROM
```

```
    books
```

```
ORDER BY Stock
```

```
LIMIT 1;
```

Calculate total revenue generated

```
SELECT
    SUM(Total_Amount) AS revenue
FROM
    orders;
```

Total books sold for each genre

```
SELECT
    b.Genre, SUM(o.Quantity) AS total_no_of_books
FROM
    orders AS o
    JOIN
    books AS b ON o.Book_ID = b.Book_ID
GROUP BY b.Genre;
```

Average price of Fantasy books

```
SELECT
    AVG(Price)
FROM
    books
WHERE
    Genre = 'Fantasy';
```

Customers with at least two orders

```
SELECT
    c.Customer_ID, c.Name, COUNT(o.Order_ID)
FROM
    orders AS o
    JOIN
        customers AS c ON o.Customer_ID = c.Customer_ID
GROUP BY c.Customer_ID , c.Name
HAVING COUNT(o.Order_ID) >= 2;
```

Most frequently ordered book

```
SELECT
    b.Book_ID, b.Title, COUNT(o.Order_ID) AS Order_Count
FROM
    orders AS o
    JOIN
    books AS b ON o.Book_ID = b.Book_ID
GROUP BY b.Book_ID , b.Title
ORDER BY Order_Count DESC
LIMIT 1;
```

Top 3 most expensive Fantasy books

```
SELECT
    *
FROM
    books
WHERE
    Genre = 'Fantasy'
ORDER BY Price DESC
LIMIT 3;
```

Total quantity sold by each author

```
SELECT
    b.Author, SUM(o.Quantity) AS Total_qty
FROM
    books AS b
    JOIN
    orders AS o ON b.Book_ID = o.Book_ID
GROUP BY b.Author;
```

Cities where customers spent over \$30

```
SELECT DISTINCT
    c.City, o.Total_Amount
FROM
    customers AS c
    JOIN
    orders AS o ON c.Customer_ID = o.Customer_ID
WHERE
    o.Total_Amount > 30
ORDER BY o.Total_Amount;
```

Customer who spent the most

```
SELECT
    c.Customer_ID, c.Name, SUM(o.Total_Amount) AS total_spent
FROM
    customers AS c
    JOIN
        orders AS o ON c.Customer_ID = o.Customer_ID
GROUP BY c.Customer_ID , c.Name
ORDER BY total_spent DESC
LIMIT 1;
```

Stock remaining after fulfilling all orders

```
SELECT
    b.Book_ID,
    b.Stock,
    b.Title,
    COALESCE(SUM(o.Quantity), 0) AS Order_qty,
    b.Stock - COALESCE(SUM(o.Quantity), 0) AS Remaining_qty
FROM
    books AS b
    LEFT JOIN
    orders AS o ON b.Book_ID = o.Book_ID
GROUP BY b.Book_ID , b.Stock , b.Title;
```

Key Insights

-  Key Insights
- Fiction and Fantasy genres contribute significantly to overall book sales and customer demand.
- A small group of repeat customers accounts for a substantial share of total revenue.
- Top-selling books and authors drive the majority of sales, highlighting bestseller impact.
- High-value orders (>\$20) represent an important portion of overall revenue generation.
- Inventory analysis helps identify low-stock books that may require timely restocking.
- Customer spending varies across cities, revealing potential high-performing markets.
- Premium-priced books contribute more revenue per transaction despite lower sales volumes.
- Remaining stock calculations provide insights into inventory health and future replenishment needs.
- The most frequently ordered book reflects current customer preferences and market trends.
- Total revenue and sales by genre help identify the most profitable segments of the business.

Thank You
